

Mission Statement

We aim to provide financial stability and prosperity for ourselves and our staff. We will provide fair, equal opportunity and properly paid employment and involve staff in all levels of the business.

We aim to provide a range of teas, coffees, drinks, cakes and light, healthy meals using as much locally sourced, fairly traded and organically grown produce as is possible.

We believe that the working environment should be safe, supportive and enjoyable and aim to create such an environment for our staff and ourselves.

We will treat all customers fairly, equally and respectfully.

We believe that the choices we make now impact upon future environmental issues and we will strive to minimise the impact our business has upon the environment.

We believe in the importance of community. We will support initiatives designed to benefit both the local community and the larger one of Newfoundland and Labrador.

We believe that art enhances and enriches our lives. We aim to increase access to the arts by providing opportunities for visual and performing arts in the coffee shop.

We believe that education is the key to the future. We aim to create a shared experience of learning and teaching for the benefit of ourselves, our customers, our community and our environment.
